Misc

How to use **Mull** and **Librewolf** together sharing extensions, history, bookmark etc. ?

1. Install Mull browser in android and Librewolf in desktop and run there setup
2. Login to firefox and start sync on both, for Librewolf you have to [enable it](#) from preferences settings. It will sync bookmarks, logins detail saved, history, cc information saved and open tabs
3. For extension/addons, you can install extension that is supported in android but to use unsupported make collection of them on [firefox collection tab](#)
 - add extension to it
 - [Settings>About Mull](#) and click on mull icon until it says developer mode enabled. Then you can find [custom addon in settings](#)
 - Now click on custom addon from settings and fill collection id and name for example : this is my collection url : <https://addons.mozilla.org/en-US/firefox/collections/69/Extension-for-Android/> so id is "69" and name is "Extension-for-Android"
