Useful Tools

- Magisk Delta ⭐ - An unofficial magisk with MagiskHide and SuList support, developed by the infamous HuskyDG

- LSPosed ⭐ - A Xposed module manager, needs Magisk

- MRepo - A Magisk Module Manager

- SysctlGUI ⭐ - A GUI application to edit Android kernel variables at runtime in a rooted environment

- Fox Magisk Module Manager - Magisk Module Manager to help you download and install Magisk modules

- GAppsMod - The ultimate All-In-One Utility to tweak Google applications.

Magisk Modules

- revanced-magisk-module ⭐ | Generate custom patch- For installing yt revanced & yt music revanced rooted version

- zygisk-detach ⭐ - Detaches installed modded/rooted apps from Play Store against its aggressive updating policy (see usage instructions btw)

- BCR ⭐ - BCR is a simple Android call recording app for rooted devices or devices running custom firmware **(not tell that you are recording call)**. Once enabled, it stays out of the way and automatically records incoming and outgoing calls in the background.

- BCR-GUI - Companion app for BCR

- safetynet-fix - For passing safety-net attestation

- PlayIntegrityFix - For passing playstore device certification

- Viper4android - Audio mod [closed source app]

- ViperFX RE (ViPER4Android FX Redesign) - ViPER4Android FX with material you design and improvements

- Pixelify | Screenshots - Magisk module to enables pixel exclusive features and ui (all exclusive pixel stuff like call screening, hold for me, unlimited photos, quick phrases, new google assistant etc in all your android devices)

- Detach3 - Magisk module for detaching apps from the Google Play Store. It removes your defined packages from the 'Manage apps and device" section and disables them from auto-updates.

  > Scenario : Use it to prevent automatic updates for Revanced/YouTube (Prevent crashes from occurring in the ROOT build)

- Cemiuiler - MIUI Customizer Xposed Module

Xposed Modules

- XPrivacyLua - Xposed Module Repository ⭐- Really simple to use privacy manager for Android 6-12 (successor of XPrivacy).Revoking Android permissions from apps often let apps crash or malfunction. XPrivacyLua solves this by feeding apps fake data instead of real data.

- Game-Unlocker ⭐ - Unlock higher FPS in games, Spoof your device as different model for specific games to unlock higher FPS

- IGExperiments ⭐ - Enable dev menu & experiments for Instagram!

  - Rooted Devices

  - Non-Rooted Devices (Using LSPatch)

    - IGExperimentsPatcher - get patched apk
